

Pentascle Practice

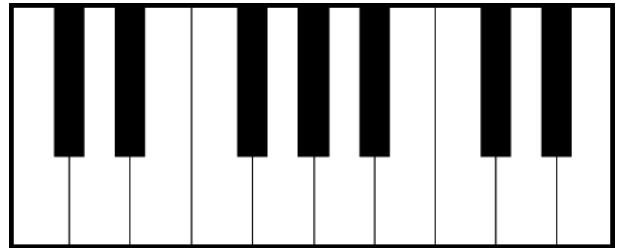

You can build a major pentascle (five note scale) in any key by remembering the following pattern of steps:

1st note—Whole—Whole—Half—Whole

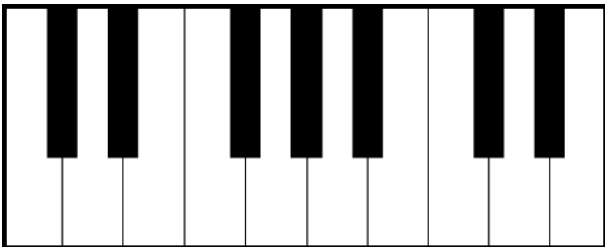

Place an X on the correct keys to create each of these major pentascles, then play each one on the piano!

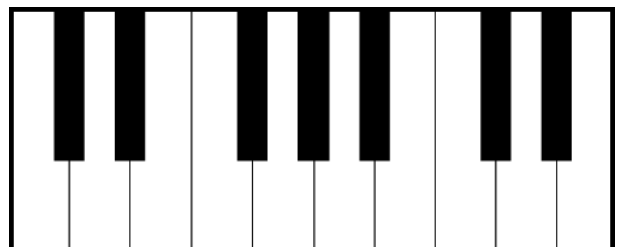

F major

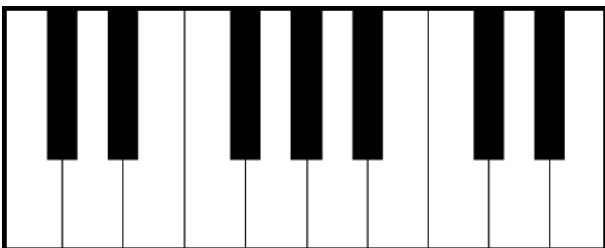

D major

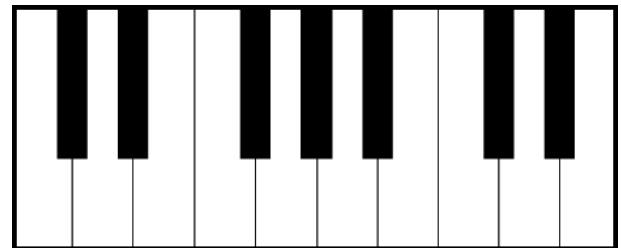

A major

Eb major

F# major

E major

Bonus challenge: can you change each of these into a minor pentascle by lowering the third note?
